EXTRA FACTOR

PROJECT 5

DESIGN BRIEF

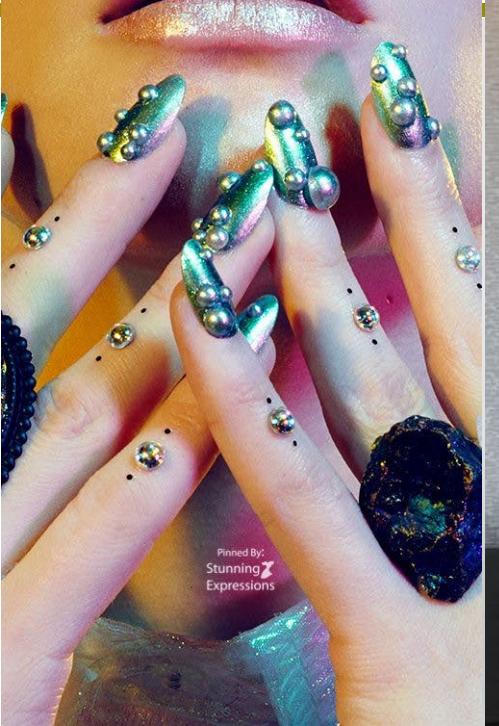

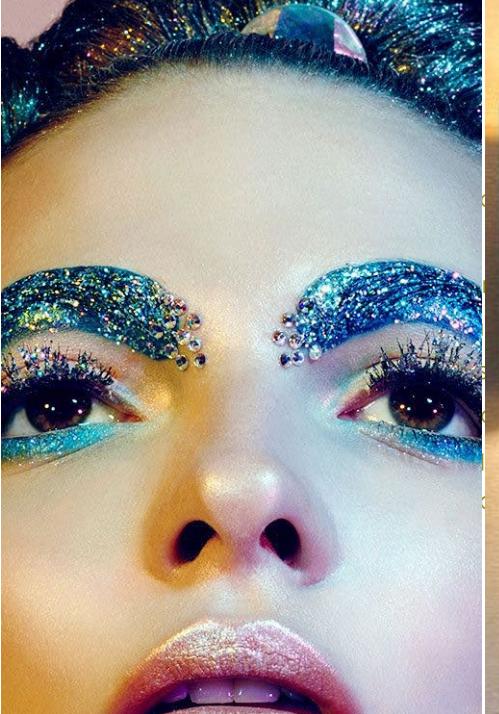

Extra Factor: The look is inspired by all the people who want something extra in their life, and they don't want to settle for less. Be it the laser cut belt design in footwear, which can give an extra trendy and eye-catching look to the shoes, or the matter of printing on the shoes of Sole. Yes, you heard that right. Printing on the sole is a new and trendy concept. Ever wondered, that decorative buttons design on your footwear to give it an edgy look? or how about that engraving design? Sounds wonderful, super stylish, and a little extra right? Just like you, since you are a little extra and unique girl.
